May 31, 2019

To Whom It May Concern:

ARRA Compliance Certification

Product: PVC SDR 26 & SDR 35 Solvent Weld and Gasketed Sewer, and DWV Fittings

Plastic Trends, Inc. dba NAPCO Pipe & Fittings certifies that all fittings produced for the above mentioned products are manufactured and assembled in Shelby Township, Michigan and are in full compliance with ARRA rules and requirements.

Our injection molded fittings are produced from PVC compound made by our parent company, Westlake Chemical Corporation located in Houston, Texas with multiple manufacturing sites in the United States. With respect to the ARRA, all the products and components are finished and produced in the United States with the exception of the fitting gaskets which are produced in Costa Rica and are not available by any domestic manufacturer.

Gaskets are categorized as a component of the finished product and do not require domestic production under the rules and requirements of ARRA, since most if not all, PVC pipe and fittings produced in the United States are produced with gaskets made in Costa Rica, Mexico or India, as there is not a domestic manufacturing source available.

Our products are in full compliance with the Substantial Transformation Checklist and are in compliance with the Submittal Checklist for Adequate ARRA Buy American Certification.

Sincerely,

A handwritten signature in cursive script, appearing to read "Mark E. DaSilva".
