## Made in USA Certification

To Whom It May Concern:

This is to certify that as defined in 49 U.S.C. 5323(j)(l), and the applicable regulations in 49 CFR part 661, all of our PVC pipe is produced in the United States of America at one of eight manufacturing facilities:

- Booneville, Mississippi
- Greensboro, Georgia
- Janesville, Wisconsin
- Leola, Pennsylvania
- Lodi, California
- McPherson, Kansas
- Wichita Falls, Texas
- Yucca, Arizona.

Polyvinyl chloride resin, the primary material in our products, is made by Westlake Chemical Corporation, NAPCO's parent company at their Calvert City, Kentucky, Geismar, & Plaquemine Louisiana, and Aberdeen, Mississippi facilities.

In addition to PVC pipe and fittings, our composite couplings, injection molded fittings, and spline components are also manufactured at facilities in the United States.

Due to lack of domestic options capable of meeting our requirements, our profile gaskets and O-rings are sourced from vendors located outside of the United States.

If we may be of further assistance, please contact Customer Service at 855-624-7473.

Sincerely,

**NAPCO Pipe & Fittings**
