To whom it may concern,

All RBP Plastic Trends molded saddles are manufactured to ASTM D3034 standards and have a Standard Dimension Ratio of SDR26. SDR26 has a thicker wall thickness than SDR35 and has a pipe stiffness of 115 vs 46 (SDR35).

All ASTM D3034 sewer pipe has a consistent outside diameter, therefore an SDR26 saddle will also fit SDR35 pipe.

A handwritten signature in black ink, appearing to read "Jay Eversoll".
